

Label winding made easy

Winders from DTM Print make it easy to un- and rewind large quantities of labels. Double your unwind capacity and no longer self-rewind the labels by hand.

Key facts

They're perfect for use with virtually any desktop label printer, no matter the printing technology. The DTM Label Winder Series includes the following models:

- ▶ DTM RW-4 Label Rewinder
- ▶ DTM RW-7/RW-7+ Label Rewinder
- ▶ DTM RW-8 Label Rewinder

The lateral guides of all **DTM Label Winders** guarantee an optimal parallel, tight and straight winding, which is essential for further processing, e.g. in a labelling unit. There's no need to work by hand anymore!

Load an up to 220 mm (8.66") wide roll and double your unwind capacity. Larger rolls typically have lower costs per label and save time as reloading circles decreases.

Each RW-4, RW-7/RW-7+ and RW-8 works as an unwinder, too!

Tape the printed output onto a core of your choice, drop the dancer arm and start your job. Your labels will be rewound with perfect alignment and just the right amount of tension for either hand application or on a label applicator.

The **DTM UW-4 Passive Label Unwinder** works powerless and stand-alone.

It's the perfect accessory if you want to increase your unwind capacity with up to 114.3 mm (4.5") wide rolls.

DTM UW-4 Passive Label Unwinder in combination with DTM FX510e Foil Imprinter

Winding Speed

User adjustable, up to 30 m/min

Automatic Stop

When end of roll or another interruption occurs

Roll Width

Up to 220 mm (8.66")

Winding Direction Switch

For either label inside or outside

What's in the box?

- ▶ Label winder
- ▶ 1.5", 2" and 3" core adaptors (RW-4/RW-7/RW-7+ only)
- ▶ Power supply
- ▶ Instructions

LABEL REWINDER

With modular cores the RW-4 and RW-7/RW-7+ Label Rewinder from DTM Print are your flexible companions for a time-saving workflow.

Key facts

- ▶ Modular core adaptors
- ▶ Coloured LED indicator provides operation status
- ▶ Usable as rewinder and unwinder by easily switching from "Inside" to "Outside" mode
- ▶ Gummed dancer arm attracts dust and keeps it off your label surface
- ▶ User adjustable winding speed of up to 355 mm/s (14"/s)

Load a roll with a width of up to 178 mm (7") to the RW-7 or one with up to 120 mm (4.72") width to the RW-4, either wound-in or wound-out. The arm can hold a roll weight of up to 5 kg and with the core adaptors you're super flexible. Easily change from 1" cores (without adaptor) to 1.5", 2" or 3" cores.

Wound In/Label Inside

Wound Out/Label Outside

Need more width?

The RW-7+ Label Rewinder includes all features of RW-7 but with a 1" wider roll mount.

Load rolls with a width of up to 215 mm (8.46").

The RW-8 Label Rewinder from DTM Print is your perfect accessory for heavy duty jobs. It offers support for heavy rolls with its solid metal construction.

Key facts

- ▶ Supports up to 250 mm (10") OD with a roll weight of up to 8 kg
- ▶ Control panel allows the user to set a speed limit and winding directions
- ▶ User adjustable winding speed of up to 500 mm/s (19.6"/s)
- ▶ L-shaped support arm enables the use of heavy and wide rolls
- ▶ Usable as rewinder and unwinder by easily switching from "Face-In" to "Face-Out" mode

Control Panel

L-shaped support arm

The RW-8 Label Rewinder complements the DTM Winder Series in the upper range for up to 220 mm wide rolls. For heavy and very wide rolls an L-shaped support arm is included, which can be mounted in seconds if required.
